

WIMUKTHI MANCHANAYAKA

SOFTWARE ENGINEER UNDERGRADUATE

PROFILE

I am an enthusiastic software engineering student seeking an opportunity in a well-respected organization. I aim to learn new skills, expand my knowledge, and apply my education practically. My dedication and determination help me overcome challenges and achieve success.

EDUCATION

BSc (Hons) in Computing

University of Coventry
Reading

HIGHER NATIONAL DIPLOMA IN SOFTWARE ENGINEERING

National Institute of Business Management (NIBM)
Intend to complete

Current GPA: 3.9 / 4.0

DIPLOMA IN SOFTWARE ENGINEERING

National Institute of Business Management (NIBM)

GCE Advanced Level

Maliyadewa Boys College, Kurunegala | 2020
Physical Science Stream

PROJECTS

ECOSORT: SMART WASTE DISPOSAL

May 2024 - June 2024

Developed an IoT-based waste segregation system named "EcoSort" to differentiate between wet and dry waste. The system sends notifications via email and a mobile app when bins are full. Integrated with buzzer and light indicators, it uses a real-time database for instant updates.

DELIBOT: URBAN FOOD DELIVERY ROBOT

Mar 2024 - Apr 2024

Designed and built "DeliBot," a food delivery robot utilizing image recognition for indoor navigation. Controlled via a web app over Wi-Fi, the robot was programmed using Arduino and C++ for efficient delivery in urban environments.

LANGUAGES

English - Proficient

Sinhala - Native

LINE FOLLOWING AND OBSTACLE AVOIDING ROBOT

Feb 2024 - Feb 2024

Engineered a robot capable of following a designated path while avoiding obstacles. Constructed using electronic components and programmed with Arduino, the robot demonstrated path-following and obstacle-avoidance.

STELLAR SYNC: WEB CHAT APP

Jan 2024 - Feb 2024

Developed "Stellar Sync," a secure chat application featuring end-to-end encryption. Built using Spring Boot and MongoExpress, the app supports real-time messaging and notifications, ensuring secure and efficient communication.

ASL GESTURE RECOGNITION SOFTWARE

Dec 2023 - Dec 2023

Created a deep learning model in Python to recognize ASL gestures using a Convolutional Neural Network (CNN).

RECIPE PORTAL REST API

Sep 2023 - Sep 2023

Designed and implemented a REST API for a recipe portal, streamlining access to a wide array of recipes and functionalities, enhancing user experience.

WPL HARDWARE: DYNAMIC WEB APP DEVELOPMENT

Jul 2023 - Aug 2023

Developed an interactive and dynamic website for "WPL Hardware Company" with an interactive cart, animations, and WhatsApp integration.

E – LIBRARY MANAGEMENT SYSTEM

May 2023 - Jul 2023

Contributed to the development of an e-library management system with a user-friendly interface and a robust database. Utilized Java and MySQL to ensure efficient management of library resources and user interactions.

COLD FRESH: GUI APPLICATION

Jan 2023 – Feb 2023

Created a database-driven software application for the juice bar "Cool Fresh" using C#, ADO.NET, SQL and WPF. The application streamlined operations and improved customer service.

ELECTRONICS TRAFFIC PROJECT

Sep 2022 - Dec 2022

Worked on enhancing a traffic system using electronic components and custom code. Developed a functional model with upgraded features to improve traffic management and safety.

WEBSITE FOR PHOTOGRAPHY

June 2022 - Sep 2022

Developed a responsive photography website, featuring numerous animations and interactive elements. The website enabled users to explore details across various photography categories and provided an integrated contact form for inquiries and bookings.

PROFESSIONAL SKILLS

Flutter | Dart | Kotlin | Spring Boot | Java Swing | Python | C# | Linux | PHP | HTML | C++ | CSS | JavaScript | Bootstrap | JQuery | SQLite | MySQL | NoSQL | PL/SQL | MongoDB

SOFT SKILLS

Communication | Teamwork | Problem-solving | Patience | Innovation | Creativity | Decision-making | Motivation | Visionary Thinking
